# TRIAX **Cast**

Dependable casting – dedicated support

[triax.com](https://www.com.com)

## The **best entertainment** hotels can give their guests is the entertainment they **bring from home**

### Satisfy new market demands

With today's explosion in demand for streaming services, a straightforward, professional casting solution is an essential amenity for any hotel.

With TRIAX Cast, hotels can offer guests a true home-from-home experience, and capitalise on the trend towards "Bring Your Own Content".

TRIAX Cast complements in-room entertainment solutions and takes the in room guest experience to new levels.

### Dedicated support, added value

The high-quality TRIAX Cast solution is built on our newly merged company's strong R&D foundation and customer-focused values.

Comprehensive technical training, pre-programming, project and after-sales support is available across our combined network, with regional experts talking the local language of installation partners and dedicated to their business.

New business opportunities provided by TRIAX Cast enable system integrators and installers to offer a complete hospitality solution, by combining TRIAX's integrated platform of connected services including guest information, entertainment, and gigabit networking and WiFi.

### Easy to install, privacy focused

Install and configure TRIAX Cast in a flash, using Google Chromecast securely attached to each TV with the TRIAX CastLock, protecting it from theft and tampering.

Via the unique information displayed on the in-room TV, a private and secure connection is established to the guest's device via the TRIAX Cast server.

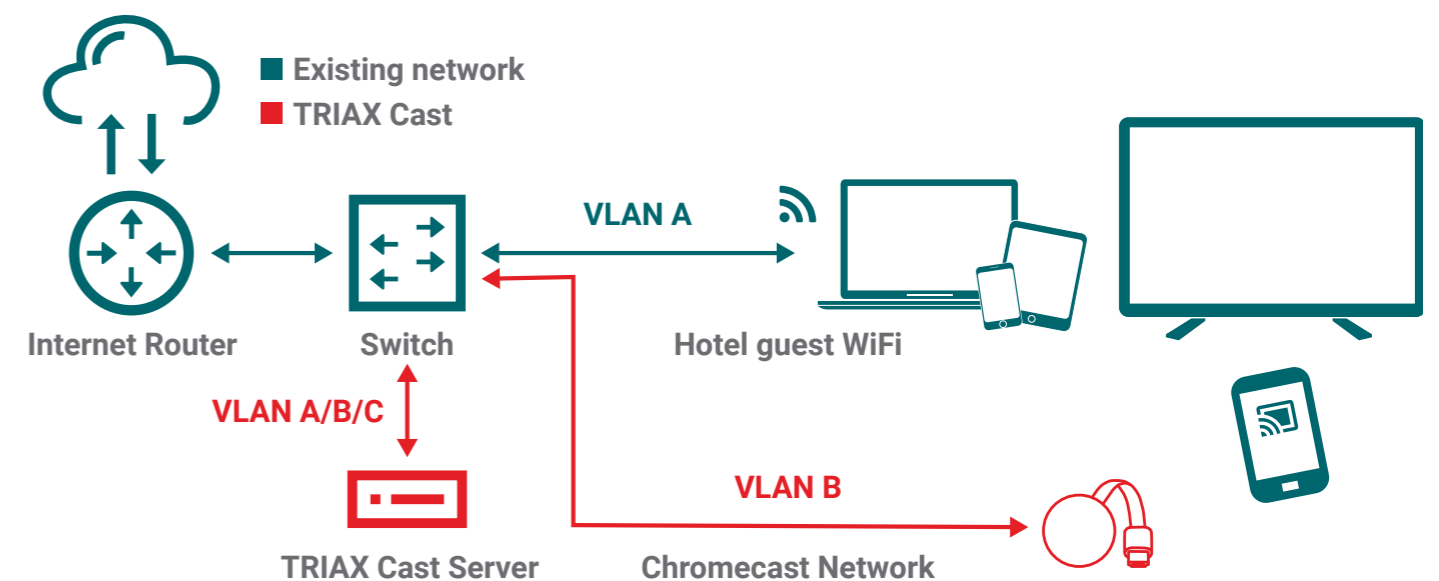

Guest privacy is assured, with every session unique to the guest, their room, and their device, and terminated at checkout.

### System setup

TRIAX Cast is added to an existing hotel WiFi network by simply connecting a TRIAX Cast Server to a trunk port of the existing Ethernet switch. The existing Guest WiFi Network remains in its own separate VLAN, while new VLANs for a Google Chromecast Network

and Management Network are created. System configuration and routing between networks is carried out by the TRIAX Cast Server, achieving isolation between guest and Cast devices.

## Contact

[triax.com/contact](http://triax.com/contact)

TRIAX is a global supplier of reliable, innovative products and solutions for the reception and distribution of video, audio and data signals.

We merged in 2021 with Ikusi Multimedia, with a shared vision of being our customers' preferred connectivity partner through cutting-edge technological leadership.

Our Products are used in homes, businesses and operator networks by broadcasters, satellite, cable and telecom operators.

Our Solutions combine our hardware and software expertise to deliver value to hospitality and related markets, through a partner network of system integrators, large installers and operators.

Our combined company of 260 employees is jointly owned by Polaris Private Equity and Velatia Group. See [www.triax.com](http://www.triax.com) for further info.
