The Standard in Fire Systems

R&D

Advanced is known all over the world for making the best quality, best performing fire systems. We design 'easy' into all of our products. We make our software intuitive. We deliver fast, accessible support, training and service. Above all, we make it easy to rely on Advanced.

Fire Systems are in our DNA. Our people are among the most talented and experienced in the fire systems business. We train talented engineers and technicians every year. 25% of our business is dedicated to R&D. Our knowledge is unmatched, anywhere in the world and we're determined to keep it there.

Our systems are protecting people and property in over 60 countries worldwide, in many of the most prestigious and challenging locations. We realise our growth comes from the strongest customer relationships. We stay friendly, flexible and reactive to your requirements and our customer service is consistently rated excellent.

We manufacture all of our panels in the UK to demanding quality standards and hold global approvals. We enjoy full ISO 9001 compliance across manufacturing and design.

We are proud to be part of Halma plc, a FTSE 100 company dedicated to growing a safer, cleaner and healthier future for everyone, every day. Halma is an international market leader in specialist safety, health and environmental technologies.

A HALMA COMPANY

Welcome to the world of Advanced

The Unbeatable Multiprotocol Solution from Advanced

The multiprotocol market is driven by freedom. Specifiers want to choose the best performing panel and match it with the most appropriate detector range.

End users want freedom from expensive maintenance contracts and installers want to work with easy to use systems, free of restrictive agreements.

MxPro is the market-leading solution and delivers performance, choice and real freedom.

MxPro includes two panel ranges, the advanced MxPro 5 and the benchmark MxPro 4. Both come in 1-8 loop formats and are compatible with Apollo, Argus, Hochiki and Nittan protocols. MxPro is simply the best multiprotocol solution available. We do not lock customers into an installer network. We design our panels to be easy to install, configure and operate, from single panel installations to 200 panel networks. We offer our installers full, free training and the most comprehensive customer support available.

We were the first panel manufacturer to offer a three year guarantee as standard but your MxPro system will last a lifetime. It's a reliable, scaleable solution that can grow as your specification changes and we offer lifetime support.

M^{*}_xPro⁵

APPROVED EN 54-2, 4 & 13

Our Most Advanced Panel

MxPro 5 is our highest performance, analogue addressable fire panel and is fully approved to EN54 Parts 2, 4 and 13.

APPROVED

MxPro 5 fire panels have been certified by FM Approvals, enabling them to carry the FM APPROVED diamond, one of the most prestigious certifications marks in the world.

MxPro is the result of decades of fire alarm and detection experience and research and development involving installers, specifiers, consultants and end users across the world.

MxPro 5 has been designed to offer industry leading power and performance. It packs more configuration, display, status and control options into its interface as standard than any other Advanced fire panel to date.

MxPro 5 utilises the latest technology making it significantly more powerful than the MxPro 4. Its processing power means it delivers more features than other panels, an advantage it will maintain for years to come.

Every MxPro 5 panel supports Advanced's unbeatable networking capabilities as well as our Dynamix Tools fire panel software making it both easy to use and configure, from the smallest to the largest of sites with the most complicated cause-and effects.

- Compatible with Apollo • Discovery and XP95, Argus Vega, Hochiki ESP and Nittan Evolution protocols
- Approved to EN54 Parts 2, 4 and 13

Why do I need Part 13?

Part 13 compliance ensures that a fire system will continue to perform to its maximum capability during a fire situation. Increased current in alarm conditions combined with a high resistance connection

(e.g. an incorrectly tightened screw in a sounder base), could prevent the sounders and beacons from operating on what would have incorrectly appeared to have been an acceptable 'fault free' installation.

Advanced's MxPro 5 is one of the few EN54 Part 13 approved panels available. MxPro 5 continuously monitors all transmission lines for compliance, checking and reporting faults every minute of every day.

MxPro 5 - 1 Loop

- Single loop
- Small enclosure
- Maximum 7Ah internal batteries
- 20 programmable LEDs
- Optional programmable key switch
- Programmable Input
- Medium, Large and Deep enclosure options

MxPro 5 - 2 Loop

- Medium enclosure
- Maximum 12Ah internal batteries
- Up to 50 additional programmable LEDs
- Up to 8 programmable key switches or 4 plus printer
- Plexi-glass door option
- Large and Deep enclosure options

MxPro 5 - 8 Loop

MxPro 5 - 4 Loop

- One to four loops
- Large enclosure
- Maximum 17Ah internal batteries
- Up to 200 additional programmable LEDs
- Up to 8 programmable key switches or 4 plus printer
- Plexi-glass door option
- Deep and Extended enclosure options

- Two to eight loops
- Extended enclosure
- Maximum 45Ah internal batteries
- Up to 200 additional programmable LEDs, 2 x switch cards or mimic
- Up to 8 programmable key switches or 4 plus printer
- Plexi-glass door and external battery box option

MxPro 5 - Integrated Peripheral Bus

- Integrated P-Bus as standard on all MxPro 5 panels
- Up to 32 expansion cards can be added to an MxPro 5 panel
- Peripheral expansion option cards include
 - 4 way relay card
 - 4 way sounder card
 - 10 way monitored input card
 - Conventional zone card (8 class B or 4 class A zones
 + 3 programmable relays)
 - 16 way push button/48 LED card
 - 16 way input/48 output (direct drive LED outputs)
 - Fire and Fault Routing/Protection Card
 - Redundant Controller

MxPro 5 - Rack Mount

- Rack mountable control panels
- Additional 16U and 20U high IP55 enclosures
- · Rack mount peripheral chassis plate, LED and switch card module options
- Dedicated Mimic door option

MxPro 5 - Remote Terminals

- Four types available including;
 - TouchControl touchscreen with active maps
 - Remote Display Terminal
 - Remote Control Terminal with additional Mute, Silence, Reset and Resound keys
 - Remote Control Terminal with additional LED status indication, four programmable push buttons, Mute, Silence, Reset, Resound, Lamp Test and Evacuate Keys.
- Optional level 2 access enable key switch. (Not TouchControl).
- Integrated standard or fault-tolerant network interface with screen termination point
- Programmable display for up to 2,000 zones along with sector based controls

The Benchmark Fire Panel

The industry workhorse, performing across the world, in all kinds of applications.

MxPro 4 is approved to EN54 Parts 2 & 4 MxPro 4 is a world-proven multiprotocol fire panel range. Built on Advanced's well established Mx-4000 platform, it's a fire system installed in 100,000s of locations worldwide, from single panel, single loop installations to large multi-panel networks.

The precursor to the MxPro 5, it offers uncomplicated operation as standard and can be expanded with a huge range of peripherals and accessories to meet most needs and configurations.

MxPro 4 utilises a simplified version of our Dynamix Tools fire system software allowing easy set up and management.

Features

- 1, 2, 4 or 8 loop formats
- Up to 254 devices per loop (Protocol dependent)
- Up to 1,000 fire detection zones
- Up to 203,200 devices per network
- True peer-to-peer networking
- Networkable up to 200 nodes
- Supports intelligent remote terminals, BMS interface, IP Gateway and I/O programmable I/O devices
- Circuit monitoring of local panel circuits
- Autolearn and Loop Detection
- Simple Select & Click

Advanced Networking

Our high performance network technology works across the MxPro range delivering the easiest setup and best performing fire panel networks available.

Advanced Networking allows all MxPro series control panels, remote terminals and network peripherals to be connected together using standard fire resistant two-core cable. It provides both the benefits of distributed intelligence and reduced installation costs whilst catering for the smallest two-panel network through to the largest 200 panel, wide-area, networked system. The network operates as a true peer-to-peer system and is therefore not reliant on a single 'master' panel to function. It allows information from any input or output device to be passed over the network and displayed on any MxPro control panel or remote terminal as required. Details include Fire, General Alarm, Pre-alarm, Fault, Control Inputs and Disablement as well as analogue values, test instructions and status information.

The zoning facility allows the networked system to share up to 2,000 zones giving non-confusing indication and allowing true peer-to-peer cross panel report, control and site-wide cause and effect functionality.

Simply adding and connecting a network card allows any MxPro control panel or remote terminal to be networked. Autolearning the devices, adding text and assigning the zone numbers allows a working and compliant fire system to be achieved easily. All other nodes on the system will be instantly aware of a panel as soon as it is given a valid network node address, allowing additional panels to be added at any time with a minimum amount of reprogramming.

All panels provide valuable diagnostic and status information and also have the facility to prevent the transmission of fires or faults during commissioning. For more complex systems, our Dynamix Tools software makes for easy configuration of complicated causeand-effect, whilst all the configuration data is contained within one user-friendly network configuration file.

ipGateway

ipGateway provides a secure, remote internet connection to an Advanced fire system via a standard web browser. No special software is required.

The state of each device on the network is displayed and users can Enable/Disable zones, Enable/Disable devices, Reset, Mute, and Silence/ Resound sounders on the network.

The ipGateway can also be configured to react to events on the network by sending emails or SMS messages to configured recipients.

PC-Net Graphical Control Software

- Highly configurable to specific system
- Our graphical control software monitors the entire fire system through site maps, text and icons
- Users can isolate by selecting icons and devices
- Fire panel controls include Mute, Silence, Re-sound, Reset, Disable/Enable and Evacuate
- Event reports and log with analysis features

Advanced BMS

The BMS Interface allows any MxPro system to interconnect and communicate with independent 3rd party BMS (building management systems) as well as PC based graphical control systems. This allows the fire system to be managed using existing fire or facilities management systems.

Physical connection to the external system is via a serial connection allowing the external BMS/Graphics systems to issue commands and receive information whilst the BMS interface handles all network traffic and event prioritisation. Multiple BMS interfaces can be connected to an AdNet network allowing independent connections to a wide range of control systems.

Dynamix Tools

Dynamix Tools is fire system software designed for users. It is easy to operate, easy to understand and makes the complicated simple.

Dynamix Tools comprises a range of specific tools allowing users to achieve what they want quickly and easily, not get bogged down in large, clumsy and complicated software.

Config Tool

- Full configuration of single panel or network system
- Automatic design check of site configuration
- Assistants menu helps the engineer to easily configure panels
- Import, export information and print configuration reports

Logo Tool

- Allows the installer's logo to be displayed on the panels graphical LCD display during Normal Operation
- Uploads standard bitmap images
- Tool allows creation of logos
- JPG and GIF images can be imported

Dynamix Tools is being continually developed for the MxPro 5 panel range, adding new features and performance enhancements. Recently these have included comprehensive false alarm management and alarm verification features.

Service Tool

- Extract device information and event logs from single or multiple panels
- Device History including last activation, test, enable, disable and date created
- User defined filters allow data to be grouped and searched in many different ways
- View device status, analogue values and drift (contaminated) information
- Network simulation and test feature
- Categorise events and create User defined reports

Мар Арр

- Used to easily add site maps to TouchControl touch screen repeater
- Can use any illustration from a photo to a line drawing, isometric or plan.
- Simply draw hotspots onto drawing to add fire zone
- Export to microSD card to add to TouchControl RCT

Our position in the global fire industry means we help guide legislation and can implement software changes quickly, keeping our customer systems right up to date. We also listen closely to our customers and often produce features for specific client requirements.

Terminal Tool

- Virtual panel display supports remote interrogation
- Direct USB/RS232 or remote Modem/ IP connection
- Real time status information and control
- Event log can be downloaded

Touch**Control**

Touchscreen. Remote Control Terminal. Active Maps & Zone Plans.

TouchControl is Advanced's innovative new remote control terminal and repeater.

Easily installed, its HD display enhances any architectural environment and takes system control and monitoring to the next level.

Features:

- Attractive, low-profile HD display 10" screen enhances prestigious environments.
- Easy Slide-in Installation
 Two-part slide in assembly for quick first fix and final install.
- Cost Minimising

It's a stand alone unit, you don't add cost to the fire panel with a compromised touchscreen.

• Easily Configured Fully active remote control terminal and network device almost immediately after installation.

- Interactive Maps and Zone Plans Easily added, using any diagram via our Map App.
- 'At a Glance' System Status
 Unique interface allows easy monitoring and management of zones and devices.
- Complete Control

Three level access to all the controls you'd find on an Advanced RCT via an easy to use interface.

• Customisable Screen Choose from the preloaded background screens or add your own including installer logos. Run reception presentations. Immediately reverts to Fire use when system signal received.

AlarmCalm Red Line False Alarms

Complete False Alarm Management.

AlarmCalm uses fast hardware, powerful software and intelligent loop devices to build a total solution to false alarms that's powerful and easy to configure.

The AlarmCalm Button is a fully intelligent verification device that is installed on the loop and works with the AlarmCalm software to allow occupants to acknowledge a fire alarm signal locally, if they believe it has been caused by say smoke from toast or shower vapour.

Features:

- Complete Case-and-Effect
 In depth control over alarm verification
 and investigation delays to outputs.
- Customised Management for any Site Divide your building(s) into Building Areas, each with quickly applied group or unique false alarm management settings. 200 Building Areas per panel or 40,000 per network.
- Unlimited points No restriction to the number of points in a Building Area and you can configure by point.
- Global Acknowledgement
 Panel inputs can be programmed to manage verification and output delays.
- Full Event Log All verification and output delays recorded in panel event logs.

• Flexible Verification

Set verification by Building Area, day/night, on or off, change verification times, verification by second device of device mode change.

- Multiple Verification Inputs and Outputs Inputs can include optical, heat and multisensors, callpoints and AlarmCalm Button or other input modules. Outputs can be sounders, beacons and relays etc. Sounder ring styles can be configured.
- Failsafe Operation

Total control over verification times. Users can only extend Verification once. Set max number of areas in Verification before full Fire is signaled.

Easy Management of Outputs

Output delays are handled in exactly the same way as Verifications, making set up very simple.

Advanced **360***

Advanced360 offers total customer care from a staff of industry experts and engineers.

Support can cover help specifying a system or during installation or maintenance. Advanced360 also delivers full, free-of-charge installer training, online and telephone support and system and fault modeling services. It's advanced, end-to-end fire system support, free to all customers.

New Lifetime Support Portals

Advanced360 now offers our customers personalised support for their whole Advanced careers, via online portals. Services include:

- Technical Support Open and view support tickets and see full support history.
- Training

AdSpecials

The Best Custom Build in the Industry.

Advanced's special engineering team develops unique interfaces and panel solutions to specific customer requirements. Solutions can include mimic panels, special enclosures, environmental protection, high specification control units, third party system monitors, interfaces and control units and $8 + \log p$ panels in a variety of enclosures.

The AdSpecials team can manage the whole process from specification and design to manufacture and delivery and will project manage the process so deadlines are maintained.

Product Code	Description
	MxPro 5 Peripherals
Note; Additional Pe	ripherals listed under MxPro4 / MxPro 5 Universal Peripherals
MXP-501	Remote battery temperature sensor
MXP-502	Loop driver card - Apollo, Hochiki, Argus, Vega
MXP-567	Loop driver card - Nittan
MXP-503 *	Network card - standard
MXP-505	Sounder (pt13) active EOL
MXP-506	Routing termination card
MXP-507 *	2-way relay card
MXP-509 *	Network card - fault tolerant
MXP-512 *	Printer assembly
MXS-509	Spare paper roll for Mxp-512 printer
MXP-532 *	Routing / protection interface
MXP-536 *	P-BUS 8-way conventional zone card
MXP-537 *	P-BUS 10-way switch input card
MXP-538	P-BUS 16-way switch (form factor) module 16 switches, 3 integrated, programmable LED's per switch (red, yellow, green)
MXP-539	P-BUS MIMIC driver card (16 input + 48 output) 16 switch inputs and 48 LED driver outputs. Supports up to 5 Mxp-052 10 relay output modules
MXP-547 *	ESPA pager interface
* Add F - for fitted	

	MxPro5 AlarmCalm
MXP-541A-002	AlarmCalm button w buzzer (Apollo)
MXP-541V-002	AlarmCalm button w buzzer (Argus)

	MxPro 5 LED Indication
MXP-513M-050RD *	50 Zone fire (red) - medium enc
MXP-513M-050RY *	25 Zone fire (red) + fault (yel) - medium enc.
MXP-513M-050YL *	50 Zone fault (yel) - medium enc.
